

WE'RE BRINGING NEW ENERGY TO CENTRAL QUEENSLAND

THAT'S A FUTURE MADE IN AUSTRALIA

Central Queensland's been powering Australia for generations. And now, we're bringing new energy to our region. Already, clean energy projects across Australia, like the Bouldercombe Battery Project in Rockhampton and the Fortescue Green Energy Facility in Gladstone (one of the world's largest hydrogen electrolyser manufacturing facilities), are generating new local jobs, training our people, boosting our economy and making energy more affordable. Powering Central Queensland for generations to come. **Find out more at futuremadeinaustralia.gov.au**
