

## COVID 19 ISSUES

I was convinced that with the government “forcing” everyone to have the vaccinations that the Australian medical profession would have done the due diligence & the vaccines would be safe so I went ahead & had them as soon as they became available.

27/3/2021

1st AstraZeneca COVID injection

21/6/2021

2nd AstraZeneca COVID injection

July 2021 I started losing muscle strength. I initially put it down to “self isolation” & COVID lockdown but now (in hindsight) I believe it was related to the AstraZeneca vaccinations. Had I recognised this I wouldn't have had the Pfizer Booster.

16/12/2021

Pfizer COVID Booster.

January 2022 I was losing strength. I have a mine [REDACTED] [REDACTED] & was previously able to hold a jackhammer above my head. By late January 2022 I couldn't even open a bottle of water. My wife had to open bottles for me or I had to hold the lid between my teeth & twist the bottle. I developed Ear Aches, Shoulder Pain & my muscle strength continued to diminish. My doctor sent me to several specialists.

[REDACTED]

I believe it was all caused by the Vaccinations & Pfizer Booster.
