

## COVID -19 ENQUIRY SUBMISSION

My name is [REDACTED] I was working as an Education Assistant for a public school [REDACTED] [REDACTED]. Ive been doing this job I loved for [REDACTED] I had to hand in my keys as I was not willing to have the covid vaccine, number 1) I chose not to have anymore vaccinations at a younger age because I got sick after vaccination.

I did some research and it wasn't proven to be safe or effective. ) I watched an Oracle film titled 'Safe and Effective: A second opinion' that describes the harm people had suffered because they believed the governments narrative that this experimental injection was a 'vaccine' instead of an untested genetically modified mRNA drug.

I went to my family Dr in [REDACTED] asking for informed consent, the dr could not give me informed consent. [REDACTED] so did not choose this. As December was coming up, I knew what was coming with the no jab, no job policy playing out, I then went to another Dr as he was giving out exemptions. He took my blood tests for [REDACTED] and I was to be given an exemption on my next visit which gave me peace of mind that I would still have my job that I love. When I called for my blood results and next appt the surgery told me that this particular Dr had been suspended hence I could not get an exemption, I later learnt that he was suspended for supporting people with their own health decisions.

In [REDACTED] I was not allowed on the school premises and was left without a job, no discussion, nothing even though I sent numerous letters, had no reply from anyone in the education department. Then out of the blue [REDACTED] I had a phone call I can go back to work, phone call was a Friday I went back to work on the Monday into a position I was not qualified for. Had no handover just a quick meeting.

I was out of my depth being put in a position with a different pay grade and job title [REDACTED] [REDACTED]. I ended up feeling quite ill with not knowing what I was doing, had no support etc dealing with [REDACTED] that I was not equipped for. I ended up going to people sense for counselling through all the stress I was put through that year.

This year 2023 I had a traumatic experience at work again as I was in fight/flight mode. Ive had to go on sick leave. All because I chose not to have a vaccine, my world was turned upside down.
