## Key health response measures

The govt health response was damaging to the families and communities. The hype over the number of 'cases' of covid was the data to push an experimental vaccine onto everyone. Very poor use of commonsense. Now we see the damage experienced by the community from this. How come there is an 11% increase in deaths since the jab was rolled out? Vaccine mandates affected my family and I. (not covid!)

I did not comply to the mandate for forced vaccinations and was suspended from school! I was wary of the rushed experimental vaccine and was not offered a risk assessment or even talk to my employer about compassionate grounds for our situation.

	I was originally suspended with pay, but
then without pay	
I have been an exemplary employee	with the
why am I being treated as if I have been unprofessional	
? I have suffered loss, harm and hurt through this terrible experience. When	
I was placed on suspension without pay, I lost income and was very stressed. We have	
suffered serious stress from this ordeal. I have the doctors' certificates to confirm this. For	
the first time ever I had <b>to</b>	
(evidence can be provided). I looked into o	ther employment but the directive
from forced me to be available during normal business hours. I was	
worried I would be in breach of the directive if they tried to contact me. Teaching has not	
just been a job for me, but a passion, and I was forced to consider resigning. How much	
longer could I stay in limbo before giving u	p a career that I had put everything
into, so that I could find a means to support my family? I was worried about becoming	
unemployed and unskilled as I had spent years of time and money into being a	

Please use your role to recommend commonsense to the govt. Vaccines and lockdowns are not the answer to health emergencies - healthy diet, less stress and social interactions will help strengthen your God given immune system which is infinitely more efficient and effective to control these viruses.

<u>thank</u> you for your time,

:. I was
