

Submission for the the COVID-19 Response Inquiry

I am a retired nurse living in [REDACTED]

I was horrified to read about the vaccine injuries that quickly surfaced, when the experimental mRNA vaccine was rolled out across America and Europe in 2021. Instantly some people developed severe neurological deficits like tremors and leg weakness. Others developed skin rashes and inflammatory disorders of the hands and feet. Then the cases of myocarditis started to appear in young males.

I wrote to my family and warned them not to take this vaccine as it was causing severe side effects. I kept waiting for the vaccine to be withdrawn from the market.

Instead my family like most Australians just believed the media mantra of 'safe and effective'. Australia just blindly followed the mantra set by the World Health Organisation, a group that later emerged is [REDACTED]

So far -

My [REDACTED] fled Australia as soon as the 'pandemic' and lockdowns were announced. [REDACTED] was very interested in fitness and natural health. She has not seen her children for 3 years and now lives in [REDACTED] where government control is minimal.

My [REDACTED] died suddenly after being forced to take her 5th jab, as a condition of her employment. She had no significant medical history and was otherwise well and active. The coroner's report stated her cause of death was [REDACTED]. [REDACTED] These are highly unusual conditions that normally develop over a long period and have clear signs and symptoms.

My [REDACTED] has developed [REDACTED], after being mandated to have the vaccine for work, and having two shots of Moderna. [REDACTED] is also constantly sick with covid. Prior to the vaccines she was fit and healthy. [REDACTED] is now planning to move overseas to live [REDACTED] where there is a lower cost of living and less government overreach.

The daughter of the [REDACTED] died suddenly [REDACTED] after having her 5th vaccine as part of a condition of being in the hospitality industry. [REDACTED] had no prior medical history at all and was otherwise fit and planning a marriage and family life.

All around me people are becoming sick. I see young people in supermarkets and the post office who have suffered strokes, have pale, unhealthy faces and are chronically unwell. I hear that employers are struggling to find people able to work.

[REDACTED] friends tell me that 1/3 of the Australian nursing profession has left, due to vaccine mandates or ill health after taking the vaccine. I also hear that large numbers of pregnant women are losing their babies, and those that are born alive have neurological deficits, and are failing their milestones.

[REDACTED] friends tell me that many Doctors are now unwell, and some are withdrawing from the profession, making the medical shortage even worse.

As part of my work [REDACTED] Their injuries are catastrophic and many will spend their lives on disability pensions.

Recently a data expert and whistleblower from New Zealand has revealed that for every 1,000 vaccines given, 1 person has died. Yet the media, politicians and health bureaucrats persist in pushing this experimental and deadly drug.

Society is being destroyed by this 'vaccine'. The death and ill health it is causing is literally going to destroy Australia. What are you doing??

Please stop this insanity. Stop the vaccine mandates. Apologise to all the injured people and the families of those who have died. Fund care for the sick and injured. And pull out of the [REDACTED] WHO.
